

Linux Programming: Assignment-7: 25-09-2025

1. What is a bash shell script? Give one example. (CO4)
2. Write a simple shell script to **print "Hello World"**. (CO4)
3. What is the purpose of comments (**#**) in a shell script? (CO4)
4. How do you declare variables (**int, float, double, string, Boolean, and char**) in a shell script? (CO4)
5. Write a shell script to **display the current date and time** of the system. (CO4)
6. Explain the difference between a constant and a variable in bash script. (CO4)
7. Write a shell script to **read two integer number from the user** and compute the sum of both the number. (CO4)
8. What is the use of **source** command in shell scripting? (CO4)
9. How can you **debug** a shell script? Give two methods. (CO4)
10. Write a bash script to **create and delete a file**. (CO4)

Linux Programming: Assignment-8: 25-09-2025

11. What is **a user-defined function** in shell scripting? Explain with an example.
(CO4)
12. Write a bash script with a function that **multiply two integer numbers**. (CO4)
13. Explain how **arrays (1D, 2D, and 3D)** are declared in bash scripting. (CO4)
14. Write a shell script to display elements of an array. (CO4)
15. What is the purpose of **cron** in Linux? (CO4)
16. Write a **cron** job to run a backup script every day at midnight. (CO4)
17. How do you schedule a one-time job using **at** command? (CO4)
18. Write a script to display disk usage using **df** and **du**. (CO4)
19. How can you log the output of a script using the **tee** command? (CO4)
20. Explain with an example **how shell scripting can automate system**
administration tasks. (CO4)

Linux Programming: Assignment-9: 25-09-2025

21. Write a shell script using **if...else** to check if a number is even or odd. (CO4)
22. Explain the difference between **if** and **case** statements in bash. (CO4)
23. Write a script to find the **largest of three numbers** entered by the user. (CO4)
24. How do you use a **for loop** to traverse an array in bash? Give an example. The array is defined as **arr=(123, "Abs", -2.3, 'A', 23.56, 0)**. (CO4)
25. Write a shell script to **loop through all files in the current directory** and display their names. (CO4)
26. What is the difference between **while and until loops** in bash? (CO4)
27. Write a **countdown timer script** using a while loop. (CO4)
28. How do you use **break and continue statements** in loops? Give examples. (CO4)
29. Write a script to check if a **file exists or not using the if and else loop**. (CO4)
30. Write a script to calculate **factorial of a number** using for loop. (CO4)
